Dr. Greg J. Neimeyer is professor of psychology in the Department of Psychology at the University of Florida where he currently teaches the doctoral course on Psychodiagnosis (DSM-5 and ICD) and has served both as Director of Clinical Training and as Graduate Coordinator. A Fellow of the American Psychological Association, he is also a recipient of its Award for Outstanding Contributions to Career and Personality Research. Dr. Neimeyer has published over 200 articles and 10 books, with an emphasis on aspects of professional training and development. A former Chair of the Executive Board of the Council of Counseling Psychologists in the United States, Dr. Neimeyer has also been elected as a Fellow to the Academy of Distinguished Teaching Scholars. Dr. Neimeyer currently divides his time between the University of Florida, where he has maintained a practice in the Family Practice Medical Residency Training Program, and Washington, D.C., where he directs the Office of Continuing Education in Psychology at the American Psychological Association.

Workshop description
The Diagnostic and Statistical Manual of Mental Disorders (DSM) has undergone substantial revision across its sixty years of evolution, with the latest version (DSM-5) continuing that tradition in substantial ways, including its articulation with the ICD-10 and (forthcoming) ICD-11. The discontinuation of the multi-axial system, the addition and deletion of specific disorders, the regrouping and reclassification of familiar disorders, and significant changes in the names, nature and criteria associated with various disorders all mark the fifth edition of the DSM as a substantial revision of the diagnostic system. In addition to receiving a detailed overview of the primary changes and rationales associated with those revisions, participants will also gain familiarity with the ICD-10 and experience in utilizing several novel inclusions in the DSM-5, including the new cross-cutting diagnostic dimensions and the new Personality Disorders assessment, the PID-5, and its potential relationship to the Psychodynamic Diagnostic Manual (PDM).

Workshop Overview and Disclaimers
The Top 10 Most Significant (and Controversial) Changes
DSM History and ICD History and Contemporary Context
DSM-5 Revision: Process and Organization
• Section I: DSM Basics
• Section II: Diagnostic categories, criteria and codes
• Section III: Emerging Measures and Models
Specific Revisions and Reorganization of Disorders
• Neurodevelopmental Disorders
• Schizophrenic Spectrum and Other Psychotic Disorders
• Bipolar and Related Disorders
• Depressive Disorders
• Anxiety Disorders
• Obsessive-Compulsive and Related Disorders
• Trauma and Stress-Related Disorders
• Dissociative Disorders
• Somatic Symptom Disorders
• Feeding and Eating Disorders
• Sexual Dysfunctions
• Gender Dysphoria
• Substance-Related and Addictive Disorders
• Personality Disorders and the PDM
• Neurocognitive Disorders

Back to the Future: The DSM and the ICD
