

## **Join us for the International Gambling Conference (IGC) being held 29 June – 1 July 2022**

*He haerenga – A journey from harm to well-being*

Hosted by the Gambling and Addictions Research Centre at AUT and PGF Group, this well-established biennial event is one of the leading international conferences on preventing and minimising harmful gambling, attracting delegates from New Zealand and around the world. Be at the forefront of changes in the gambling landscape and be part of a conference featuring compelling workshops and international keynotes.

Due to the possibility of disruptions from the global pandemic, this conference is being offered as a hybrid event with options to attend in person or online. IGC2022 will physically be held at the AUT City Campus, Auckland, New Zealand (as in recent years).

The theme for the Conference is He Haerenga – A journey from harm to wellbeing. IGC 2022 will provide a forum for all to share their unique journey in the area of gambling-related harm and wellbeing. We aim to facilitate an environment where global, ethnic and individual perspectives on the concepts of harm and wellbeing foster robust discussion and debate.

**For those wanting to make a presentation, abstract submissions close Sunday 20 February 2022, so get in quick!**
