The workshop will address both the schema and 'mode' models. The training is skills based, with multiple opportunities to learn complex techniques for working with difficult-to-treat clinical populations, with a particular focus on Borderline Personality Disorder and its treatment. This workshop will provide you with a good platform for learning and practicing skills, as well as direct coaching of skills therapists often feel less confident in applying. This workshop is accredited by the International Society of Schema Therapy (ISST) as a 3-day introductory workshop that can be used for the purpose of accreditation as a schema therapist (for more information on our ISST accredited training program see [www.schematherapytraining.com](http://www.schematherapytraining.com))
